

PROGRAM DESCRIPTION

The Tai Chi Fundamentals® Program (TCF) provides a prequel and support to a lineage tai chi form, and creates a bridge between tai chi practice and the medical model. The first program of its kind, it provides a clear, systematic approach for mastering tai chi basics that builds from simple to complex patterns of movement. Integrates mind/body components of tai chi with clinical overview, movement analysis, therapeutic & functional applications.

✚ **Program Elements:** movements are taught in a motor development progression. The first section introduces simple movements that also can be practiced with walkers and modified for wheelchair use. Includes three elements:

✚ **Movement Patterns:** graded sequence of exercises with symmetrical arm movement that reinforce functional movements repeated throughout the tai chi form. Introduced in a motor development sequence, they have applications both as assessment and intervention tools

✚ **Fundamentals Form:** sequence of simple to more complex movements of modified Yang Style tai chi.

✚ **Mind/Body Principles:** guidelines for fostering mind/body integration, effective movement and sense of well-being.

Development: in 1996 by Tricia Yu, MA and Jill Johnson, MS, PT, targeting elements from traditional tai chi that enhance balance, coordination, strength and endurance.

The TCF Program has been featured in: *PT Journal, Journal of Rehab Management, The Gerontologist, APTA's GeriNotes, Medline Plus, Topics in Geriatric Rehabilitation, Journal of Asian Martial Arts, Wellness Program Management Advisor, American College of Sports Medicine's Health and Fitness Journal, and Massage and Bodywork.*

CERTIFICATION

Requirements: 30 contact hours, individual home practice, application, fees, demonstration of movement proficiency, and written exam. Those with no previous experience usually need 6 months practice and study before applying.
